

## Lanyard ABSORBICA®-Y TIE-BACK MGO, Petzl

### Product information

The ABSORBICA®-Y TIE-BACK is a double lanyard with integrated intermediate tie-back rings and compact energy absorber. It is designed for vertical progression on very large structures and when passing intermediate anchor points. The TIE-BACK system allows the lanyard ends to be reconnected to fit around structures with a very large cross section. The arms are elasticized to avoid hindering progression.

- TIE-BACK intermediate tie-back rings on the lanyard allow connection to very large structures, and in a rescue situation, these rings are easily accessible for the rescuer, even when the person is suspended on the lanyard after a fall
- Absorbs energy in the event of a fall:
  - Tearing of the energy absorber webbing limits the impact force on the user
  - Works with users who weigh between 50 and 140 kg (1)
  - Progressive tearing reduces the deceleration on lightweight users
- Minimal bulk:
  - Compact energy absorber facilitates handling
  - Elasticized arms to avoid hindering progression
- Durable fabric pouch with opening system at each end, protects the energy absorber from abrasion or contaminants while allowing for regular inspection of the absorber

**Material:** Polyester, high-modulus polyethylene, aluminum

**Marking:** According to standard, CE-marked, UKCA-marked

**Temperature range:** -30°C up to +50°C

**Standard:** EN 355
