

Carriage IKAR for Personal Fall Protection Devices

Product information

The IKAR Carriage is a mobile anchorage point for securing one person to a construction. The existing construction should be able to withstand the forces in the direction of the load which arise in case of a fall (compliant with EN 795 certification by the technical construction regulations).

- Corrosion-resistant V2A stainless steel design
- Smooth-running design due to guide rollers with dual ball-bearings
- Track clearance adjustable with eccentric bolts on the carriage for optimum play-free running performance
- Low-noise running characteristics due to polyamide rollers
- Follows automatically in a vertical position above the user
- Impact bumpers mounted on both sides
- Available for various IPE beam sizes

Marking: According to standard, CE-marked

Standard: EN 795-B
