

Fall Arrest Block IKAR HWB 2 ME

Product information

The IKAR Retractable Type Fall Arrester HWB 2 ME has been tested and approved as a restraint system and fall protection system.

The length of use can be limited using the dial on the device. Adjustment steps of 0.25 m enable the lifeline length to be adjusted in order to adjust the Retractable Type Fall Arrester for the given application as a restraint system and to avoid a fall. The limitation of the lifeline length can only be released by pressing the push button on the adjusting wheel. The lifeline length can be set between 1.00 m and 2.50 m.

Unique aspects of the HWB 2 ME is that it combines the advantages of an IKAR height safety device with a restraint system. Classic advantage like:

- Avoids slack lanyard
- Arresting falls with minimal arrest forces and arrest distance (< 6 kN)
- Compact design

Carabiner: IKV 11

Marking: According to standard

Standard: EN 360
