

Evacuation Device IKAR ABS 3a W 2P

Product information

The controlled descent device ABS 3a W is the result of continuous advancement of our well-proven rescue technology. During the descent process, the centrifugal brake keeps the device at a constant speed during the entire descent.

With the help of the new deviation point on the device, the descent speed can be regulated. The ABS 3a W is the ideal device for self-rescue / multiple evacuations or for training measures.

- Resistant and low-maintenance descent device with swivel with ball bearing
- Robust, seawater-resistant aluminium housing with Kernmantle rope \varnothing 10.5 mm as
- Standard connector IKV 11
- WKF-rope pulley

Marking: According to standard, CE-marked

Temperature range: -40°C up to +50°C

Standard: EN 341, EN 1891-A
