

## Safety Hook Swivel, Gunnebo BKLK Offshore HDG

### Product information

Offshore safety hooks are essential components used in the maritime and offshore industries to ensure safe lifting operations. These hooks are designed with specific safety features to handle the harsh conditions and heavy loads typical in offshore environments. Here are some key points about offshore safety hooks:

#### Design and Features:

- Offshore safety hooks often come with self-locking mechanisms to prevent accidental release of the load.
- They are typically made from high-strength materials and are hot-dip galvanized to resist corrosion in marine environments.
- Some models, like the Swivel Safety hook BKLK Offshore HDG, are DNV type approved, ensuring they meet stringent safety and performance standards.

#### Applications:

- These hooks are used in various offshore operations, including lifting and handling equipment on oil rigs, ships, and other marine structures.
- They are designed to handle heavy loads and are often used in conjunction with other lifting equipment such as cranes and winches.

#### Safety and Compliance:

- Offshore safety hooks must comply with international safety standards, such as DNVGL-ST-0378 and DNVGL-ST-0377.
- Regular inspection and maintenance are crucial to ensure the hooks remain in good working condition and do not pose any safety risks.

#### Manufacturers and Products:

- Companies like Nautilus Rigging, Henriksen, and Gunnebo Industries are well-known manufacturers of offshore safety hooks.
- Products such as the Nautilus self-locking hooks and the Henriksen Hooks are designed with advanced safety features to enhance operational safety and reliability.

For more detailed information, you can refer to specific product listings and technical documents from these manufacturers.

**Features:** DNV Approved.

**Material:** Quenched and tempered alloy steel

**Marking:** Code and grade.

**Safety factor:** See table

**Grade:** 8
